About This Game

Retool is a 3D hacking puzzle game set on incomplete orbital defense stations that circle around Sinai, home planet of the alien species known as Onix.

After 43 years of war, the Onix triumphed and defeated the humans. The victory came at a cost of destruction to their planet and orbital stations. Instead of repairing it themselves, the Onix used their captured prisoners as slave labor to rebuild their destroyed properties, starting with the stations.

You are Maria, an engineer that was captured in the final weeks of the war. Having hacked your way out of your prison cell on a station, you must escape and return home.

gamedpad keybord and mouse not working i cant start the game from main menu. If you can get past the crappy res it's stuck on, this is a really cool game. I enjoyed it immensely, and it's more than worth the money and time. We need more point-and-click adventure games!. Good as I remembered it from the 360!. You either die a merchant or live long enough to become a warlord.. A great Game. Lot of fun. I'd like to see more Games like this. The "2 PLayer in the same room but only one PC" Option is wonderful!. A cute wee pack. I got it for the female clothing and it looks cute. The characters get the chickpea plant which seems to really decent way of making moneyVxp (though not like, game breaking). They wear the outfit with three colours in the first screenshots, and the bunting flags V tents and tower flags work really well with plants and making a fun junction area.

I surrounded mine by the windmill setup, hay bales, some flowers, well, and stone paths. I dont know if there's a house in this pack, i havent seen it yet sadly but I'm gonna have another look. Otherwise it looks cute! Worth the 32 I spent.. Great little puzzle game. Loved the graphics and music - very soothing. Some levels make you think for a bit but overall not too hard. Ideal for a casual puzzlegamer.. sure it could certainly use more, but what it does do is use the basic tools of this type of genre, and adds the flick of a wrist,mouse. and although targeting could be smoother, it does the job fine on my settings, for the price is totally worth it.

Games looks so boring.. Poor optimized map, hard to get solid 60fps at some area.weapon shortcuts is bad,healing also in weapon selection which is confusing,no gun attachment,no scope addon,no inventory system its like playing an old quake 2 in open world map. Ai bots also horrible with bad aiming and no skill whatsoever.You should close this game until everything is complete just like horizon source.. Perhaps one of my favorite combat aircraft i have installed. It handles very nice but be careful when maneuvering above 300knts.. Pretty bad hidden puzzle game. I like this kind of game, but this one is too awkward. Silly combos for just about every object, ambiguous graphics on even the first couple levels.. I really enjoyed this experience. Though it is short, the environments are very well made and immersive as well as the story. I look forward to more story driven content like this for VR.. Been following this teams' games for a while, since the Cube Escape Series. Imagine my delight when they announced several Steam new releases! Great game and series. Definitely a recommend if you're a fan of old-school Escape the Room-style games, meta-puzzles, and good ole problem-solving. A great buy for about \$3.. What an anticlimax. Was a very dull expeirence. Clearly trying to be sophisticated and stylish but the main character is not compelling enough. Also the dreadful ending. Why on earth did they use that 'stock' girls scream?? With all the care and effort in the production they spoilt it with that? At least make her sound like she is seriously suffering with gasp's for a quick death. Take a look at the original Alien film for inspiration on the sounds of death. In fact take a look at Alien period on how fear should be part of the eccence of this tosh.. Yes it's an idle game but i **ADORED** this on android. It's balanced by your choices of characters and what you equip them on each run of the dungeon. Some in game items are overpriced but they all cost more or less the same with actual money. For example, the "speed up dungeons" thing you can buy costs 50 million in game gold, or 1.99. Nothing really goes any higher than 2 bucks.

You can choose between playing like an RPG or letting the game auto battle. Sometimes its beneficial to do it yourself to make better choices. It's a great balance between idle and actual game. All i can say is, give it a try, and get to at least level 100 in game. It's really great and won't take that long.
